

# Introducing your new food waste service

Your new weekly food waste collections  
will start from the week commencing

**30 September 2019**

Please continue to use your  
existing bins and do not use your  
new kitchen caddy and outside  
food waste bin until then.

## 1 Line the grey kitchen caddy

If you would like to line the grey kitchen caddy please use:

- **compostable liners**
- **newspaper**

Compostable liners are available in supermarkets or online. Look for the seedling logo.

**Please do not use plastic bags in your caddy.**

## 2 Put all your leftover food into the grey kitchen caddy

Fill your grey kitchen caddy with cooked and raw leftover food. For example bones, meat, fruit, vegetables, eggshells, bread, leftover meals etc.

**Please see the reverse of this leaflet for a list of accepted food waste.**

grey kitchen caddy

## 3 Empty the caddy into your outside food waste bin

Once the grey kitchen caddy is full, empty the contents into your outside black and orange food waste bin and **lock the lid**.

The food waste bin is locked when the handle is in the **upright** or **forward** position, so it can't spill even if knocked over.

**Every week** on your collection day, put the food waste bin out for collection with your other containers (please make sure the lid is locked).

# What can I put in my food waste bin?

## YES PLEASE

## NO THANKS

### Home composting:

If you already compost at home please continue to do so. You can use your food waste collection for all food that you do not want to compost at home.

### What happens to the food waste?

The food waste is taken to a local facility where it is composted using a natural process that meets animal by-product regulations. This means it is safe to use as a soil improver on local farmers' fields.

# Recycling More Together
